# ABOUT AGRIFUNDER

Agrifunder is an **independent company** that delivers **working capital solutions** to agricultural businesses via an agile funding platform, strategic partnerships and professional management team.

We understand the agricultural industry is complex and requires specialised solutions. Our aim is to focus on key industries, constantly developing our working capital solutions to meet the growing needs of our customers across the supply chain.

To do this we have developed a partnership model which connects institutional and private investors, distributors and producers so that we are able to provide funding throughout the agricultural commodity working capital cycle.

The first of our working capital solutions is for **livestock**.

# AGRIFUNDER LIVESTOCK FUNDING

Agrifunder has the capability to fund up to **100% of the value of livestock** for producers who are finishing livestock for domestic and export markets.

Typically land is not required as the security. Instead **livestock act as the security**. This enables us to provide you with the capital to fund livestock whilst you focus on what is important, weight gain and finished animals.

We provide **fixed rate funding** and an online account through which you choose the animals, the target weight and finish date.

It is intended to provide you with **greater transparency and financial capacity** to help you grow your business.

# TERMS & CONDITIONS

## Key criteria:

- credit criteria must be met
- appropriate livestock insurance in place
- use of approved Agrifunder agents

**Facility limits:** \$100k - \$2m (funding requests greater than the standard limit will be reviewed on a case by case basis)

**Max. placement term:** up to 12mths\*

**Standard security:** is taken over the purchased livestock via PPSR PMSI. (AF will not fund sheep on a property where another financier owns/funds livestock unless RFID tags are used)

\*A 'placement' refers to funding for a particular livestock trade. Once a producer has been approved for funding by Agrifunder they will be given a limit within which they can apply for funding for livestock trades
